AUDITOR'S REPORT

To: The Members of the Legislative Assembly of Saskatchewan

I have audited the statement of net assets available for benefits, accrued pension benefits and surplus of the Pension Plan for the Academic and Administrative Employees of the University of Regina as at December 31, 2006 and the statements of changes in net assets available for benefits and changes in accrued pension benefits for the year then ended. These financial statements are the responsibility of the Plan's management. My responsibility is to express an opinion on these financial statements based on my audit.

I conducted my audit in accordance with Canadian generally accepted auditing standards. Those standards require that I plan and perform an audit to obtain reasonable assurance whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation.

In my opinion, these financial statements present fairly, in all material respects, the net assets available for benefits, accrued pension benefits and surplus of the Plan as at December 31, 2006 and the changes in net assets available for benefits and changes in accrued pension benefits for the year then ended in accordance with Canadian generally accepted accounting principles.

Regina, Saskatchewan
May 25, 2007

Fred Wendel, CMA, CA
Provincial Auditor

**Pension Plan for the Academic and Administrative
Employees of the University of Regina
Notes to the Financial Statements
December 31, 2006**

1. Summary of Significant Accounting Policies

The financial statements are prepared in accordance with Canadian generally accepted accounting principles. The following accounting policy is considered significant.

Investments

Investments are comprised of units in a pooled fund called the University of Regina Master Trust. Additional units are acquired when assets are transferred to the Fund and when distributions are made by the Fund. The Plan can realize changes in the underlying unit values by redeeming units.

Units in the pooled fund are recorded in the accounts at their net asset value per unit. The net asset value per unit is the market value of the pooled fund's investments divided by the total number of units outstanding in the Fund.

The change in net asset value of the Fund during the year is reflected in the Statement of Changes in Net Assets Available for Benefits as Unrealized appreciation of investments.

Authority for the Plan

Section 62(j) of *The University of Regina Act* provides that the Board of Governors may establish a system of pension or retiring allowances for any or all classes of University officials and other employees.

2. Plan Administration

The Academic and Administrative Pension Plan was established June 30, 1965. In December 1974, the Board of Governors of the University of Regina accepted sponsorship of the pension plan for its employees. The Academic and Administrative Benefits Committee is a sub-committee of the Board of Governor's Human Resources Committee and has the responsibility to administer the Plan according to the terms and provisions of the Plan agreement. The University has appointed, through agreements, investment managers to authorize investments, and a trustee to maintain custody of the plan assets and invest the plan assets as authorized by the investment managers.

Description of the Plan

The following description of the Pension Plan for the Academic and Administrative Employees of the University of Regina is a summary only. For more information, reference should be made to the Plan document.

a) General

At December 31, 1999, the Plan was a contributory defined benefit final average pension plan for Academic and Administrative employees who held a permanent, probationary or term appointment, working half-time or more. Eligible employees were required to join the Plan as a condition of employment.

**Pension Plan for the Academic and Administrative
Employees of the University of Regina
Notes to the Financial Statements
December 31, 2006**

Effective January 1, 2000, a DC (Defined Contribution) component was added to the Plan for new members joining the plan on or after this date.

Plan membership is extended to those employees who qualify from Communities of Tomorrow, Petroleum Technology Research Centre, the federated colleges, Campion and Luther, and continues to be extended to the employees of the Mackenzie Art Gallery. There are 906 active members in the Plan.

b) Retirement Benefits

Defined Benefit Component:

The normal retirement date is the 30th of June coincident with or next following the 65th birthday.

The annual amount of pension is determined as 2% of the Member's highest three-consecutive-year average earnings multiplied by the number of years of credited service. The annual retirement benefit is based on maximum earnings of \$105,550 as outlined in the *Income Tax Act* (Canada).

The normal form of pension is a single life pension payable monthly in arrears with a ten year guarantee. Other options are available on an actuarially equivalent basis.

A member who has a spouse at the time of retirement shall be paid in a joint and 60% survivor form unless the member's spouse has signed a waiver under applicable legislation reducing survivor benefits for the spouse.

A member also has the option of transferring funds as described in d) Termination Benefits or to any other prescribed retirement plan that is registered under the *Income Tax Act* (Canada).

Defined Contribution Component:

The normal retirement date is the 30th of June coincident with or next following the 65th birthday.

Upon retirement, the full value of the DC member's account is transferred to a prescribed retirement plan that is registered under the *Income Tax Act* (Canada).

c) Indexing

Eligible retired members in the DB (Defined Benefit) component may be entitled to a yearly formula-based pension increase. The plan provides post retirement indexing to 100% of the increase in the CPI (Consumer Price Index). The pension increase will commence one year after the Member's deemed retirement date.

**Pension Plan for the Academic and Administrative
Employees of the University of Regina
Notes to the Financial Statements
December 31, 2006**

d) Termination Benefits

A Member is vested and locked-in immediately upon becoming a Member of the Plan.

Under the DB component, upon termination of employment the Member shall receive a transfer to another registered pension plan, a prescribed RSP, or to purchase a deferred pension from an insurance company that is not commutable or any other retirement plan prescribed by the Income Tax Act an amount equal to the greater of the following:

- i) the Member's plus the University's required contributions with interest as at December 31, 1991, with interest to the payment date plus, for service on or after January 1, 1992, two times member required contributions with interest, plus, for periods under the Long-term Disability Plan after December 31, 1991, the Commuted Value of benefits earned during such period of disability, or
- ii) the Commuted Value of the monthly retirement benefit.

Under the DC component, upon termination the Member shall receive the market value of the DC account at the date of payment available for transfer to another registered pension plan, or a locked in retirement account, or to purchase an immediate or deferred life annuity, or a combination of these. The value of the DC account is comprised of member and employer contributions along with allocation of investment income. Investment income is defined as investment returns including change in market values less management fees and administration expenses incurred.

e) Death Benefits

i) Prior to Normal Retirement Date

Defined Benefit Component:

Upon death of a member, other than a terminated vested member or a retired member, the Member's spouse or beneficiary shall receive a transfer to another registered pension plan, a prescribed RSP, an Insurance Business to purchase an immediate or deferred pension, paid as a lump-sum cash refund, transferred to a registered retirement savings plan, or a combination of the five, the greater of the following:

- A) the Member's plus the University's required contributions with interest as at December 31, 1991, with interest to the payment date plus, for service on or after January 1, 1992, two times member required contributions with interest, plus, for periods under the Long-term Disability Plan after December 31, 1991, the Commuted Value of benefits earned during such period of disability, or

- B) the Commuted Value of the monthly retirement benefit.

**Pension Plan for the Academic and Administrative
Employees of the University of Regina
Notes to the Financial Statements
December 31, 2006**

If the Member does not have a spouse, the beneficiary receives the death benefit as a taxable lump-sum payment.

Defined Contribution Component:

Upon death of a Member and if the Member does not have a spouse, the Member's estate or designated beneficiary will receive a taxable lump sum payment of the full value of the DC account less any applicable withholding taxes.

If the Member has a spouse, the spouse will receive the market value of the DC account which can be transferred to another registered pension plan, a Locked-In Retirement Account, an Insurance Business to purchase an immediate or deferred life annuity, or a combination of the three.

ii) After Retirement

Upon the death of a retired DB member, benefit payments, if any, shall be continued in accordance with the benefit payment option elected by the member at the time of retirement.

f) Member's Contributions and Funding Policy

Defined Benefit Component:

In accordance with the Plan document, the following amounts shall be contributed with respect to each member:

- i) 11.4% of the Member's earnings, up to the Year's Maximum Pensionable Earnings (YMPE) under the Canada Pension Plan, plus
- ii) 15% of the Member's earnings in excess of the YMPE under the Canada Pension Plan; provided the earnings of a Member shall be the maximum earnings which will provide the maximum pension permitted under the Income Tax Act.

At least 50% of such contributions shall be made by the Employer. The balance shall be retained at source from the Member's earnings.

Defined Contribution Component:

In accordance with the Plan document, the following amounts shall be contributed with respect to each member:

- i) 5.7% of the Member's earnings up to the YMPE, plus
- ii) 7.5% of the Member's earnings in excess of the YMPE under the Canada Pension Plan; provided the earnings of the member shall be the maximum

**Pension Plan for the Academic and Administrative
Employees of the University of Regina
Notes to the Financial Statements
December 31, 2006**

earnings which will provide the maximum pension permitted under the *Income Tax Act*.

Contributions by the Employer shall be made on an equal basis. The required contributions shall be deducted from the Member's earnings by the Employer.

g) Interest Rate Credited

Defined Benefit Component:

Since December 31, 1995, active member and University contribution balances are credited interest each year such that the total member and University contribution balance with interest is the greater of:

- i) the member and University contribution balance at December 31, 2006 credited with the average for the year of the yields of five-year personal fixed term chartered bank deposit rates (CANSIM, Series B-14045); and
- ii) the member and University contribution balance at December 31, 2006 credited with the geometric four-year average net rate of return for the fund less 0.5%.

Defined Contribution Component:

Since December 31, 1995, active member and University contribution balances are credited interest each year based on the actual investment performance net of expenses in the year, as approved by the Academic and Administrative Benefits Committee.

h) Members on Disability

Defined Benefit Component:

Periods during which a member is in receipt of disability benefits provided from the Long Term Disability Plan of the University count as pensionable service. Employer and employee contributions continue during periods the employee is in receipt of disability benefits.

Defined Contribution Component:

The Plan continues the employer and employee contributions for periods during which a Member is in receipt of disability benefits from the Long Term Disability Plan of the University.

**Pension Plan for the Academic and Administrative
Employees of the University of Regina
Notes to the Financial Statements
December 31, 2006**

3. Plan Expenses

	2006		2005
	Budget	Actual	Actual
Actuarial and consulting services	\$ 295,870	\$226,007	\$228,148
Administration	157,985	164,639	138,805
Investment management	817,000	847,816	817,177
Trustee fees	143,000	136,766	131,382
	<u>\$1,413,855</u>	<u>\$1,375,228</u>	<u>\$1,315,512</u>

4. Accrued Pension Benefits

Aon Consulting Inc., a firm of consulting actuaries, performed an actuarial valuation as at December 31, 2005 and extrapolated this to December 31, 2006. Previous to this, an actuarial evaluation was performed as at December 31, 2003 and extrapolated to December 31, 2005. The actuary used the projected benefit method prorated on services and best estimate assumptions approved by the Benefits Committee. Significant long-term assumptions used in the valuation and extrapolation were:

	as at December 31	
	2006	2005
Salary/YMPE increases	3.0%	5.0%
Inflation rate	2.5%	4.0%
Discount rate	6.5%	7.0%
Indexing	2.5%	4.0%

Mortality tables used were the UP 1994 projected to 2007 (2005- GAM 83 projected to 2012 for pensioners and GAM 83 projected to 2019 for all others).

The actual rates may vary significantly from the long-term assumptions used. During the year, the Plan experienced a loss of \$1,450,000 composed of a \$1,843,000 loss due to interest on employee contributions greater than assumed, a \$2,000,000 loss for salary increases greater than assumed, a gain of \$1,718,000 for pensioner increases less than expected, and a gain of \$675,000 due to decrements and other miscellaneous items.

The Plan Document states that any excess surplus shall be used to reduce the contributions of the University and members equally, or used for the benefit of the members and their beneficiaries. Any use of surplus to reduce contributions of the University must be negotiated with the members as part of the collective agreements. Any use of surplus would be for the benefit of the members and their beneficiaries.

Upon termination or death of a member, the member, beneficiary or spouse shall receive a transfer as described in notes 2 (d) and (e). The December 31, 2006 actuarial present value of accrued pension benefits shown in Statement 3 contains \$1,049,043 (2005 - \$1,294,075) related to such inactive members. The DC part of the Plan also contains \$1,103,319 (2005 - \$586,660) related to inactive members. The University is attempting to transfer these amounts, but it is unknown how soon this will be

**Pension Plan for the Academic and Administrative
Employees of the University of Regina
Notes to the Financial Statements
December 31, 2006**

accomplished as the transfer is dependent upon decisions to be made by the member, beneficiary or spouse.

The following illustrates the impact that changing certain assumptions by plus or minus 1% would have on the accrued liabilities for the defined benefit component. The discount rate is equal to the inflation rate plus a real rate of return. The salary, YMPE, and *Income Tax Act* Maximum Pension increase equals the inflation rate plus 1.0%. Thus changing the inflation rate by plus/minus 1% will automatically increase/decrease the discount rate and the Salary, YMPE, and *Income Tax Act* Maximum Pension increase assumptions by 1%.

Assumption:	Adjusted Assumption (Change Made):	Change in Accrued Liability	Percentage Change in Accrued Liability
Discount rate	7.5% (Plus 1%)	(\$10,485,000)	(6.3%)
	5.5% (Minus 1%)	\$14,958,000	8.9%
Salary, YMPE, and <i>Income Tax Act</i> Maximum Pension increase	4% (Plus 1%)	\$2,276,000	1.4%
	2% (Minus 1%)	(\$1,619,000)	(1.0%)
Inflation rate	3.5% (Plus 1%)	(\$2,647,000)	(1.6%)
	1.5% (Minus 1%)	\$3,058,000	1.8%

The pension obligation is long-term in nature. The Plan has no intention of settling its pension obligation in the near term and there is no market for settling its pension obligation. Therefore, determination of the fair value of the pension liability is not practical.

5. Financial Instruments

The Plan's significant financial instruments consist of accounts receivable, accounts payable, and investments.

The accounts receivable and accounts payable are non-interest bearing financial instruments and are due or payable within the next year. Due to this short-term maturity, the fair value of these financial instruments approximates carrying value.

Effective December 1, 1995, the assets of the University of Regina's Academic and Administrative Employees and the Non-Academic Pension Plans were combined into a pooled fund called the Master Trust to improve investing opportunities. Each plan holds units in the Master Trust rather than holding individual investments.

The investment objectives of the Plan are to ensure there are sufficient assets to meet future pension obligations and to generate sufficient cash flow to meet pension

**Pension Plan for the Academic and Administrative
Employees of the University of Regina
Notes to the Financial Statements
December 31, 2006**

payments. Due to the long-term horizon of the Plan's liabilities, the Master Trust takes a long-term investment perspective.

As a result, the following risks of the Master Trust are also risks of the Plan.

a) **Interest Rate Risk:**

Interest rate risk refers to the adverse consequences of interest rate changes on the Master Trust's cash flows, financial position and income. This risk arises from short-term changes in nominal interest rates that cause differences in the timing and amount of cash flows related to the investments. Interest rate risk is managed by investing in fixed income investments of various durations.

b) **Market Risk:**

Market risk is the risk that the value of an investment will fluctuate as a result of changes in market prices, whether those changes are caused by factors specific to the individual investment, or factors affecting all securities traded in the markets. The plan's policy is to invest in a diversified portfolio of investments, based on criteria established in the Statement of Investment Policies and Goals.

c) **Credit Risk:**

Credit risk arises from the potential for an investee to fail or for a counterparty (e.g. mortgager) to default on its contractual obligations to the Master Trust. The Master Trust limits the credit risk by dealing with counterparties that are considered to be high quality. The investment policies of the participating pension plans state that short-term investments must meet a minimum investment standard of "R-1", and the minimum quality standard for individual bonds and debentures is 'B' as rated by a recognized bond rating agency at the time of purchase. The credit ratings used to describe the investments are based on the Dominion Bond Rating Service and/or the Standard and Poor's Bond Rating Service.

d) **Foreign Currency Risk:**

Foreign currency exposure arises from the Plan holding investments denominated in currencies other than the Canadian Dollar. Fluctuations in the relative value of the Canadian Dollar against the foreign currencies results in a positive or negative effect on the fair value of investments. The Plan manages the foreign currency risk by limiting its holdings of foreign investments to 46% of the book value of the entire investment portfolio.

6. Investment Performance

The University has retained Phillips, Hager & North Ltd. as investment manager of the majority of the investments. The University also contracts with Templeton Management, Bentall Investment Management, and Barclay's Global Investors to be investment managers of specific types of investments.

**Pension Plan for the Academic and Administrative
Employees of the University of Regina
Notes to the Financial Statements
December 31, 2006**

These investment managers make the day-to-day decisions of whether to buy or sell specific investments in order to achieve the long-term investment performance objectives set by the Plan. It is these long-term investment performance objectives that are used to assess the performance of the investment managers.

The primary long-term investment performance objective for the entire Master Trust portfolio is to out-perform a benchmark portfolio with weightings as follows:

<u>Asset Class</u>	<u>Representative Index</u>	<u>Weight</u>
Canadian equities	S&P/TSX Composite Index	18 %
U.S. equities	S&P 500 Index (\$C)	9
U.S. equities	S & P 500 Index - Hedged	9
Non-North American equities	MSCI EAFE Index (\$C)	18
Real Estate	Investment Property Databank	6
Bonds	SC Universe Bond Index	37
Short-term investments	91 – day T-Bills	<u>3</u>
		<u>100 %</u>

The University engages the services of Hewitt Associates, asset management consultants, to provide advice on the overall management of the Plan's investments and on the measurement of the Plan's performance. Hewitt Associates reports to the Joint Academic and Administrative and Non-Academic Benefits Committee quarterly on the investment performance in terms of the performance of the benchmark portfolio over moving four-year periods.

The one year investment objective (the return of the benchmark portfolio) was 12.5% (2005 – 9.8%). For the year ending December 31, 2006, the Master Trust/Academic Pension Plan had a gross rate of return of 13.8% (2005 – 9.0%). For the four years ending December 31, 2006, the Master Trust/Academic and Administrative Employees Pension Plan had an annualized gross rate of return of 11.5% (2005 – 6.1%). The investment objective (the return of the benchmark portfolio) was 10.8% (2005 – 5.9%).

7. Related Parties

The Plan is related to the University of Regina and other pension plans sponsored by the University. The University pays all plan expenses, pension benefits and refunds and transfers on behalf of the Plan, and then is reimbursed by the Plan. Contributions for Communities of Tomorrow, Petroleum Technology Research Centre, the federated colleges and MacKenzie Art Gallery are calculated and collected through the University's payroll process.
